RE: Phase 1 (B) Cultural Resources Survey

Dear Mr. Johnston:

The Department of Natural Resources and Environmental Control has reviewed the revised workplan for the Phase 1 (B) Cultural Resources Survey workplan dated October 6, 1993. The workplan is approved with the following condition:

The one meter by one meter excavation units should be placed in the following four locations which are slightly different than the ones stated in the workplan.

1. Upslope of the soil piles.
2. Offset from the gravel road that runs north toward Red Lion Creek.
3. South of the sedimentation basin near the 50 foot contour.
4. In the undisturbed area north of the sedimentation basin in the upland areas.

By doing this the units noted in #2-4 should form a rough profile across the area north of the plant toward Red Lion Creek.

If you have any questions, please contact me at 323-4540.

Sincerely,

Anne V. Hiller
